

Collage Mixed Media – Paint, Cut, Paste Kendra Postma – ISEA, MF, Ada Michigan.

This workshop is designed for one or two days.
Everything you need to know about collage and then some.

I will be showing you how to create a collage/mixed media piece (Day 1) and turning it into a 3-D piece (Day 2). It would be nice to work in a series but it's up to you.

For this workshop I am picking an object or you can use your own if you prefer. I will have a copy of the chosen subject for you if needed. For example, let's use an image of your favorite teacup or coffee mug. I like to start out with a painting or drawing of the chosen item in watercolor and/or acrylic, your choice. I ask that nothing be oil based.

BIO:

Kendra Postma is a multimedia and ceramic artist who lives in Michigan. Her artwork, whether it be clay from the earth or a painting with bits of paper, often takes on a dreamlike or spiritual aura.

“Look closely you might see something you don't normally see”. Her mixed media works need to tell a story so Postma's goal is to inspire those who look closely and carefully at the world around them to find beauty in the “not so normal” places.
